# membership prospectus

**PABIOMASS**  
ENERGY ASSOCIATION

---

---

## about us

**PBEA** is an industry-driven association that is working to advance the use of biomass for clean heat and for combined heat & power (CHP) applications. The association supports the use of biomass in the residential, small business, commercial, institutional, agricultural, and industrial sectors.

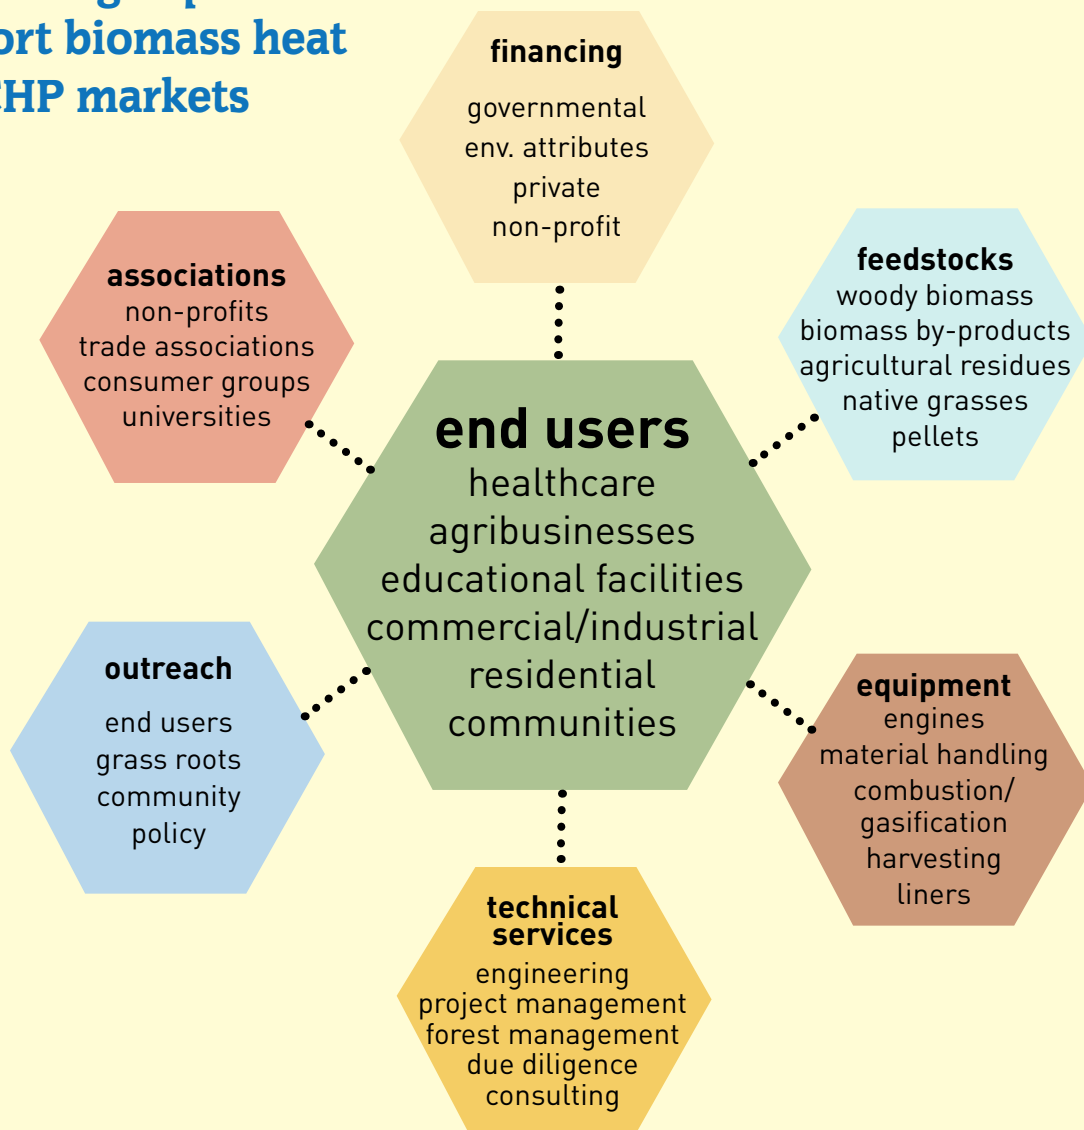

**PBEA** will work to support Pennsylvania-based manufacturing, economic development, and environmental betterment by bringing together a broad range of expertise needed to expand the use of clean, innovative biomass heat and CHP technologies.

## our mission

**PBEA** efforts are focused on three broad mission elements:

- ❑ Promote and support the use of Pennsylvania's sustainable biomass feedstocks in heat and CHP markets,
- ❑ Promote and provide guidance on clean, efficient, biomass heat and CHP technologies and installations, and
- ❑ Educate end users and policy makers on how biomass can be used to meet the heat and power needs of Pennsylvania in a cost effective, environmentally responsible manner.

## connecting expertise to support biomass heat and CHP markets

## become involved

Join PBEA and become an active member. With your participation, we hope to work together to benefit end users, the industry, the economy, and our environment. We can make a difference.

### expand an industry

The biomass heat and CHP industry in Pennsylvania is poised for growth. Lend your expertise and passion to grow the industry and participate in its opportunities.

### shared vision

Help develop a consistent, unified vision and message on how biomass can be used to meet Pennsylvania's heat and power needs.

### showcase technology

Pennsylvania is home to many biomass installations and technologies. Help PBEA to showcase these so that other end users will adopt.

### educate and shape

Help end users and policy makers understand that biomass is a cost-effective, renewable fuel for heat and CHP applications and that such applications are important in energy security.

### engage

Participate in PBEA activities with other biomass industry leaders to grow your professional network and knowledge base on biomass feedstocks, technologies, and projects throughout Pennsylvania. PBEA is working with other regional organizations that share a common vision for expanding biomass use.

### sustainable feedstocks

Advocate that when evaluating biomass use, the sustainability of the resource is important in terms on fuel cost, fuel availability, and impact on the environment.

### member benefits

Enjoy our upcoming newsletters, workshops, and annual conference. Be the first to learn about PBEA activities and participate in a forum where your voice will be heard.

## membership structure and dues

*Annual membership dues are based on a calendar year.*

<b>Founding Full Member</b> (Limited Availability)	\$5,000
<b>Full Member</b>	
Sustaining Level	\$1,000
Supporting Level	\$500
<b>Affiliate Organization</b>	\$200
<b>Individual Sponsors</b>	\$35

For more information on PBEA membership opportunities please contact us by email or phone:
